

COVID-19

VAX FACTS

7 IMPORTANT THINGS YOU SHOULD KNOW

1

COVID VACCINES DO NOT PROTECT AGAINST INFECTION OR TRANSMISSION. They are only designed to reduce symptoms [1]. Remember, COVID is an illness with a **99.9+%** recovery rate and that, for most people, has only mild or no symptoms [2].

2

COVID mRNA VACCINES ARE EXPERIMENTAL. They are **genetically engineered injections** intended to re-programme human cells. No mRNA vaccines have ever been shown to work before. No mRNA vaccine has ever been approved for the treatment of any disease before. Their long-term effects on human health are completely unknown [3].

3

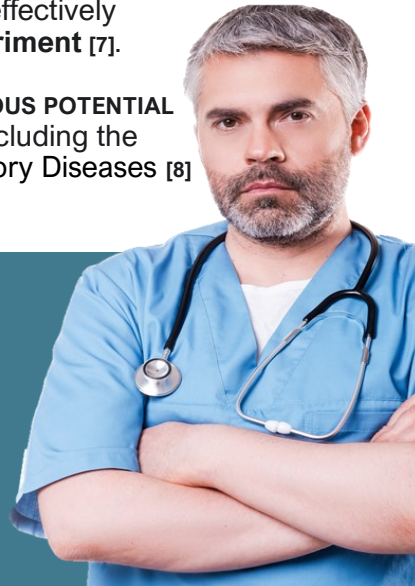

NO LONG-TERM SAFETY TESTING HAS BEEN DONE ON ANY EXPERIMENTAL COVID VACCINE [3]. Normally, new vaccines are tested and evaluated over 5-10 years to monitor for long-term side effects before even being considered for public use. Many vaccines fail to pass this safety testing. However, the new rushed COVID vaccines have **only been tested for a few months** on relatively small numbers of people, some of who died during testing or experienced serious side effects [4]. Some COVID vaccines indicate increased the risk of getting HIV and other illnesses [5]. Since roll out, there have been increasing reports of vaccine-related deaths [6]. Anyone who takes the vaccine is effectively taking part in a **very high-risk human experiment** [7].

4

STERILIZATION HAS BEEN IDENTIFIED AS A SERIOUS POTENTIAL RISK by concerned scientists and doctors, including the former Pfizer Research Director for Respiratory Diseases [8]

*"Don't forget, these vaccines are unlikely to **completely sterilize** a population. They are very likely to have an effect which works in a percentage, say **60 or 70%.**"*

Jonathan Bell, Prof. of Medicine, Oxford University
(Bill Gates-funded COVID vaccine researcher) [9].

5 NO INSURANCE COMPANY IN THE WORLD IS WILLING TO PROVIDE PUBLIC LIABILITY INSURANCE FOR THE EXPERIMENTAL COVID VACCINES because of the huge health risks involved [10].

You would not buy a car that could not get insurance. So why should you let yourself be injected with a vaccine that cannot get any patient safety insurance?

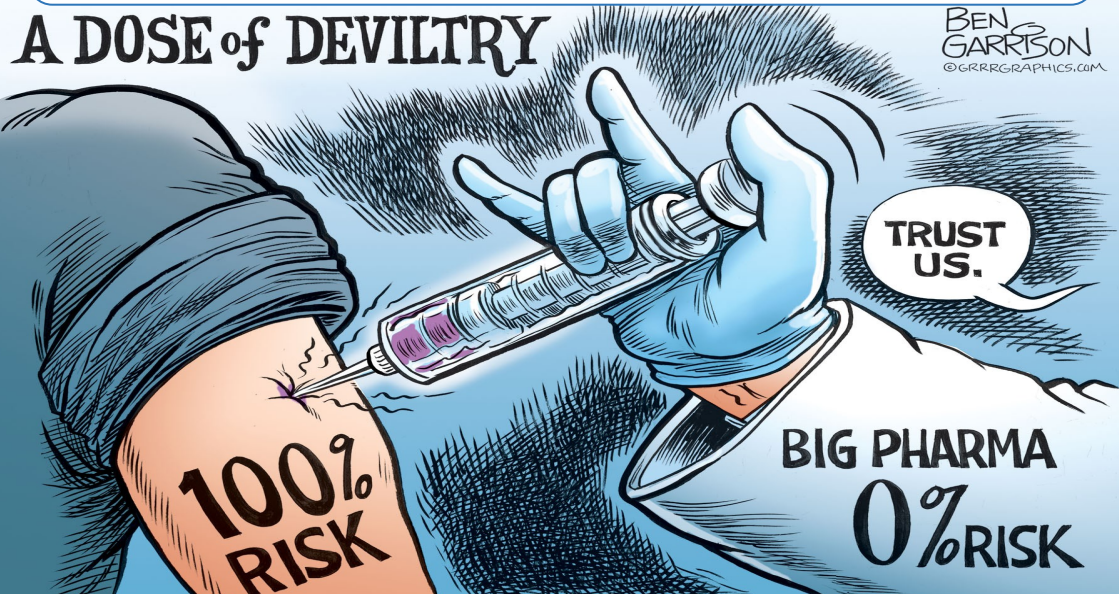

6 THE VACCINE COMPANIES CANNOT BE SUED FOR ANY HARM CAUSED. Anyone who takes an experimental vaccine is taking on 100% of the risks.

7 THOUSANDS OF DOCTORS, NURSES AND MEDICAL SCIENTISTS ARE NOT TAKING THE EXPERIMENTAL VACCINES due to the serious risks involved [11].
