

are tiny semiconductor particles a few nanometres in size, having optical and electronic properties that differ from larger particles due to quantum mechanics. **Luciferase** is a bioluminescent enzyme that is required to make the quantum dot vaccination readable through a mobile device. **Quantum Lum® Recombinant Luciferase** is a luciferase expressed from a **cloned gene from the North American firefly**. For Christians familiar with Revelations chapter 13 and 'The Mark of the Beast' it is worth noting that the Oxford English Dictionary defines the name Beelzebub (Satan) as Latin for the **Lord of the Flies**. Within a cashless society one can see how this may unfold.

Revelation 13: 16-18

¹⁶ And he causeth all, both small and great, rich and poor, free and bond, to receive a mark in their right hand, or in their foreheads: ¹⁷ And that no man might buy or sell, save he that had the mark, or the name of the beast, or the number of his name. ¹⁸ Here is wisdom. Let him that hath understanding count the number of the beast: for it is the number of a man; and his number is Six hundred threescore and six.

ID2020 & Gavi (The Vaccine Alliance)

More than 1 Billion people on the planet do not have an official form of identification, whether that be a birth certificate or license, essentially rendering them invisible. ID2020, which works with governments, NGOs and the private sector, is looking to technology to create a **DIGITAL IDENTITY** for these people. Accenture, **Gavi** and **Microsoft** are among its partners. Given ID2020's involvement with GAVI and Microsoft and given that GAVI are co-leading global efforts for the equitable distribution of a Covid Vaccine (with the help of 18 million from the Irish tax payer) one can see how this **DIGITAL IDENTITY** will not be reserved for the mere 1 billion undocumented but for the rest of us as well. **The Bill and Melinda Gates Foundation** are founding members of Gavi & have injected over 4 Billion into this digital tagging initiative. The Quantum Dot 'Tattoo' or a biochip implant will most likely be used for this purpose.

Patent WO2020060606

Recently Microsoft have filed a patent for the buying and selling of bitcoin cryptocurrency that works by a device attached to the human body that interacts with a computer network system. The device (which would likely be internal) compiles body activity data derived from the sensed body activity of the user (see Revelations 13:17-18 above).

Injected Biochip Implants for Covid Detection

The Dept. of Defence and the **Bill & Melinda Gates Foundation** have partnered with a Silicon Valley company, Profusa, to implement a technology that will see the use of an injected hydrogel biochip to connect a human to the Internet (Cloud). The chip, about the size of a grain of rice, provides feedback to a database on changes in body chemistry and other biometrics. The company says that this technology will be used to detect Covid 19 in the general population before symptoms show. This in-body nanotechnology connected to an Artificial Intelligence platform is wide open to misuse by totalitarian regimes. The hydrogel chip which is injected with a syringe, could be injected along with any Covid vaccination. Mandatory vaccination would be key to the widespread deployment of this project. **(YOU HAVE BEEN WARNED!)**

VACCINES & THEIR DELIVERY SYSTEMS

In Ireland our children by age 12/13 receive vaccines (17 shots and 2 oral drops) for approximately **40 different diseases**.

Shouldn't we at least be aware of what is being injected into their bodies?

Nano Particle Aluminium

Capable of crossing the blood-brain barrier and can persist in the brain for decades. Linked to neuro developmental disabilities particularly Alzheimers. See study by Christopher Exley, PhD, Keele University, Staffordshire, UK. January 13th 2020.

Mercury (thimerosal)

Symptoms include muscle weakness, poor coordination, numbness in the hands and feet, skin rashes, anxiety, depression, memory problems, trouble speaking, trouble hearing, or trouble seeing. Also linked to autoimmune diseases with many studies showing a link to Autism eg. Heyer et al. in 2012

Neomycin Sulphate (antibiotic)

This antibiotic comes with an FDA Black Box warning. Black box warnings alert doctors and patients about drug effects that may be dangerous. Allergic reactions can range from mild to life threatening.

Beta-Propiolactone

Known to be associated with skin cancer. Suspected gastrointestinal, liver, nerve, skin and sense organ poison.

Human and Animal DNA

Human DNA from an aborted baby/s: A **water bag** delivery technique is used where the baby is birthed alive and the organs harvested for cells for vaccines and/or for their development.

The MRC-5 Cell line in the MMR vaccine is from an aborted baby. Other Foetal cell lines include WI-38, HEK-293 and PER-C6.

Both Casino Biologics and Oxford University/AstraZeneca are using Foetal DNA cell lines in their human Covid 19 Vaccine trials. Many others (including Moderna) are using these cell lines in the vaccine development. Animal cells come from a variety of species, including monkey (kidney), cow (heart), dog (kidney), calf (serum), chicken (embryo and egg), pig (blood), and guinea pig.

Complete Immunity from Liability

Big Pharma have complete immunity from liability for damages caused to you or your child as a result of their vaccines! This is because they know that there are serious risks associated with these products.

1983	 24 Childhood vaccines	 1/2000 Autism Rate	Studies in the US have shown that rates of autism have increased in line with the vaccine schedule. In the 1980s, autism was so rare it wasn't even tracked.
2018	 72 Childhood vaccines	 1/36* Autism Rate	

If autism rates continue unabated, by 2035 experts predict that **1 in 2 children in the USA will be autistic.**

Infant Vaccinations Driving **Cot Deaths (SIDS)?**

Remarkably, after banning vaccinations for babies under the age of 2 in Japan, Cot deaths virtually disappeared. In the years that followed, Japan became known for having the lowest infant death rate in the world. In contrast, the U.S. has the highest infant mortality rate and the highest vaccination rate as well. If infant vaccinations improve health and save lives, why do statistics **NOT** support such claims? During the Covid 19 lockdowns the worldwide rate of infant cot deaths decreased by 30% as vaccination rates fell during this period. During this same period there was a worldwide very significant decrease in premature babies being born for which the same reason appears to apply: less expectant mothers being vaccinated for whooping cough and the seasonal flu.

Covid 19 Vaccine Big Players

Moderna

With significant financial backing from The **Bill and Melinda Gates Foundation** this vaccine will be the first one ever made with messenger RNA (mRNA). It uses a sequence of genetic RNA material produced in a lab that, when injected into your body, must invade your cells and hijack your cells' protein-making machinery called ribosomes to produce the viral components that subsequently train your immune system to fight the virus. There are unique and unknown risks to messenger RNA vaccines, including the possibility that they generate strong type 1 interferon responses **that could lead to inflammation and autoimmune conditions**. Moderna are using DNA from an aborted baby in the development of this vaccine. Moderna was founded by Derek Rossi of Harvard. He is credited with reprogramming a stem cell in the body using modified RNA. He founded Moderna on this concept. Elon Musk (of Space X and Neuralink) and Ray Kurzweil of Google are self proclaimed transhumanists who support this technology. Moderna have never brought a medicine, much less a vaccine to market. Injecting this mRNA vaccine into the muscle will make changes to the recipients DNA while most likely not changing the person's actual genome. This is akin to playing God in that mRNA can be used to make almost any desired change to one's DNA.

Oxford University, AstraZeneca: AZD1222 (ChAdOx1 nCoV-19)

Made by researchers at the University of Oxford and the international pharmaceutical company AstraZeneca. The ChAdOx1 vaccine is a chimpanzee adenovirus vaccine vector. This vaccine includes the HEK-293 cell line from a 1973 baby aborted in The Netherlands. the Coalition for Epidemic Preparedness Innovations (CEPI); and the Global Alliance for Vaccines and Immunization (GAVI) funded directly by **Gates** are investing \$750 million in the development of this vaccine.

CanSino, Chinese Military: Ad5-vectored COVID-19

Made by biotechnology company CanSino Biologics and the Chinese military. Like AZD1222, CanSino uses the viral vector-based vaccine based on a weakened adenovirus. This vaccine uses foetal DNA from no less than 9 babies aborted live in 2020.

BioNTech, Pfizer: BNT162b1

BNT162b1 is an mRNA-based vaccine made by German firm BioNTech & the pharmaceutical giant Pfizer. Like Moderna's vaccine, BNT162b1 uses a fatty nanoparticle wrapping to deliver a fragment of the genetic code for the SARS-CoV-2 spike protein into human cells.

Flu Vaccine for **Children in Ireland** & GP Bonuses!

- The flu vaccine for children will be available from the middle of October 2020.
- This is a quadrivalent live attenuated influenza vaccine - LAIV (as a nasal spray).
- Children aged 2 to 12 are encouraged to get this nasal flu vaccine for free through their GP although the HSE have not ruled out the possibility of it being administered in school.
- While GPs will get €15 per adult vaccination and €20 per child nasal spray vaccine, they will also get **bonuses** for extra productivity. The IMO have announced that in agreement with the Minister for Health Stephen Donnelly, GPs will receive a bonus of €100 for every 10 adults vaccinated and €150 for every 10 children vaccinated.
- The Shedding of a live vaccine from one child to another cannot be ruled out.
- The age of consent is now 16 yrs for any surgical, medical or dental treatment in Ireland.
- The HSE National Consent Policy 2019 states that a mature minor (under 16 and with no lower age limit) may be given the right to chose under certain circumstances.
- Manufactured by Sanofi Pasteur Inc. this vaccine contains Formaldehyde (Classified by US EPA as a 'probable carcinogen' and linked to Leukemia in humans).
- Thimerosal (mercury) is in the multi-dose vial of this vaccine. Mercury is highly toxic and linked to autoimmune and neurological diseases.

Flu Shot, is it worth the **Risk?**

- A 2018 US Centre for Disease Control study concluded that there is an increased risk of acute respiratory illness (ARI) among children <18 years caused by non-influenza respiratory pathogens post-influenza vaccination compared to unvaccinated children during the same period.
- Vaccinated children were 30.1 times more likely to have been diagnosed with Allergic Rhinitis and 5.9 times more likely to have been diagnosed with pneumonia than unvaccinated children (Mawson et al. 2017 Journal of Translational Science).
- 2020 Pentagon study showed that Flu vaccines increase risk of coronavirus by 36%.
- The Flu shot has never been shown to decrease the risk of flu.

Autism Spectrum Disorder in Ireland

The most recent data on the prevalence of ASD in Ireland is reported in a study carried out by Dublin City University (Boilson et al. 2016). It estimates that at this time the rate of ASD in Ireland amounts to 1 child in every 66 (This is likely to be at least 1 in 60 today).

Future Human Vaccine Delivery Systems:

Bill Gates and MIT (Massachusetts Institute of Technology) are currently developing the "Human Implantable Quantum Dot Microneedle Vaccination Delivery System." It's a 'tattoo' for the hand, which will include your identification and vaccination records. Quantum dots (QDs)
